

## Statement

### Regarding: Bisphenol A (BPA) in Sepax™ C-Pro and Sefia™ S-2000 single use kits and accessories

#### Background

Due to its hazardous properties, the use of Bisphenol A (BPA) has been limited or is being limited in the EU to protect people's health and the environment. BPA is listed in the Candidate List of substances of very high concern (SVHCs) due to its toxic for reproduction and endocrine-disrupting properties that may cause adverse effects to people's health and to the environment. BPA has been restricted as a substance on its own and in mixtures intended for consumer use in the EU since March 2018.

#### Statement

It is hereby stated that Bisphenol A is not a primary raw material in the products listed below, nor is it intentionally added or introduced during manufacture of these products.

Bisphenol A is part of the Candidate List of SVHCs, of the REACH regulation (<http://echa.europa.eu/candidate-list-table>) and is not present in the below listed products or in the parts making them at concentrations above 0.1% w/w.

A risk assessment has been performed by Cytiva and relevant information has been secured from suppliers.

Cytiva assures that purchases of materials conform to specified requirements and are acquired from qualified suppliers. This is achieved through a robust qualification process and thorough supplier monitoring process.
