cytiva

Our journey to Net Zero by 2050, with Science-Based Targets initiative (SBTi)

We are committed

2035

Near Term targets for Scope 1 and 2 by 2032 and Scope 3 by 2035

2050

Reducing 90% of our emissions across our entire footprint.* (Scope 1, 2, and 3 emissions)

Focus	Scope 1 and 2	Scope 3		
		Purchased goods and service *Cateogry 1*	Transportation *Cateogry 2*	Use of sold products *Cateogry 11*
Targets	Absolute reduction	Absolute* reduction (60%) and engagement** (40%)		Absolute reduction

* Engagement: As defined by SBTi, a supplier engagement target (SET) is a commitment by a company to engage a significant portion of its suppliers (e.g. 70% of spend) to set their own science-based emissions reduction targets. This is a primary method for addressing Scope 3 emissions.

** Absolute: The SBTi generally requires absolute emission reduction targets (Absolute Contraction Approach) for Scope 1 and 2, as they guarantee a fixed reduction in total CO_2 mass, aligning directly with the global carbon budget.

Our strategy

It boils down to **two strategies**

Do less

Decreasing how much we use or need. Increasing resilience and efficiency.

Go green

Working with customers and suppliers to foster innovation and collaboration focused on material and fuel alternatives.

How will we reduce our footprint and help you reduce yours?**

Scope 1 and 2

- Renewable electricity
- Transitioning away from natural gas
- Energy efficiency
- Electric fleet

Scope 3: Purchased goods and services

- Less plastic and alternatives to virgin plastic and less plastic
- Supplier collaboration
- Improved packaging
- Green and recycled steel
- More sustainable cardboard
- Eliminating or reducing use of high CO_2 chemicals chemicals

Scope 3: Transportation

- Customer collaboration
- Supplier collaboration
- In region for region
- Route optimization
- Transport mode shift
- Sustainable aviation fuel
- Biofuel

Scope 3: Use of sold products

- Continuous processing and process intensification
- Lower energy use
- Smaller footprint

* A small remainder will be neutralized.

** These examples illustrate the levers we will use to achieve our goals. Specifics and corresponding weighting may adapt over time to reflect the most suitable and impactful approaches.
