

Statement

Regarding: Animal origin information for ReadyToProcess™ columns

Chromatography resins

Based on statements from our suppliers of raw materials, chromatography resins are animal origin free or meet the guidelines outlined in EMA/410/01, rev. 3. To the best of our knowledge, the BSE/TSE issue does not concern these products.

Statements concerning non-animal origin for BioProcess chromatography resins are available at www.cytiva.com/regulatorystatements. Information regarding non-animal origin for chromatography resins can also be found in Certificate of Analysis, available at www.cytiva.com/certificates.

Statements concerning BioProcess chromatography resins manufactured using animal derived raw materials are available upon request.

BioProcess chromatography resin products and their different pack sizes are numbered: XXXXXYY where XXXXXX refers to a specific product and YY refers to a specific pack size (typically 25 mL - 60 L).

Bulk resin with code number XXXXXX00, used in ReadyToProcess columns are equivalent to the corresponding chromatography resins XXXXXYY.

Column wetted parts

Based on statements from our suppliers, the fluid path components of the products are animal origin free or meet the guidelines outlined in EMA/410/01, rev. 3. Cytiva does not intentionally add animal origin materials during our manufacturing processes.

This information is valid for all standard and custom ReadyToProcess columns with column housing inner diameter 80-359 mm and 450-600 mm and column bed heights 50-250 mm.
