

**Carbon reduction plan template**  
**Commitment to achieving Net Zero**

Supplier name: Cytiva (Global Life Sciences Solutions, Operations UK Ltd)

Publication date: 22 May, 2026

**Commitment to achieving Net Zero**

Cytiva (Global Life Sciences Solutions, Operations UK Ltd), as a part of the Danaher Corporation, has committed to set both short-term and long-term targets on a path to Net Zero emissions by no later than 2050. This complements the existing commitment to reduce Scope 1 and 2 emissions by 50.4% by 2032, as stated by Danaher Sustainability Report 2024. Cytiva (Global Life Sciences Solutions, Operations UK Ltd) is wholly owned by Danaher (2200 Pennsylvania Avenue, N.W., Suite 800W, 20037-1701 Washington DC, United States of America – I.R.S. no. 59-1995548).

**Baseline emissions footprint**

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emission reductions can be measured.

**Baseline year emissions**

<b>EMISSIONS</b>	<b>TOTAL (tCO2e)</b>
<b>Scope 1</b> Baseline year: 2021	31 998
<b>Scope 2 (market-based)</b> Baseline year: 2021	68 897
<b>Total Scope 1 and 2 emissions</b> Baseline year: 2021	100 895
<b>Scope 3 (included sources)</b> Baseline year: 2024	615 418
<b>Upstream transportation and distribution</b>	149 774
<b>Waste generated in operations</b>	2 423
<b>Business travel</b>	23 141
<b>Employee commuting</b>	14 486
<b>Downstream transportation and distribution</b>	1 031

### Current emissions reporting

Reporting year: 2025	
EMISSIONS	TOTAL (tCO2e)
Scope 1	35 032
Scope 2 (market-based)	9 347
<b>Total Scope 1 and 2 emissions</b>	44 379
Scope 3 (included sources)	In progress, estimated to be available in Q4 2026.
<b>Total Scope 3 emissions</b>	In progress
<b>TOTAL Scope 1, 2 and 3 emissions</b>	In progress

### Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following reduction target:

A 50.4% absolute reduction in Scope 1 and 2 emissions by 2032.

At the close of 2025, Cytiva has already achieved a 55% absolute reduction of 44379 tCO2e, exceeding the 2032 science-aligned target, 7 years in advance.

### Carbon reduction projects

#### Completed reduction initiatives

The following environmental management measures and projects have been completed or implemented since the 2021 baseline (Scope 1 & 2) and 2024 baseline (Scope 3). The carbon emissions reduction achieved by these schemes equate to 54224 tCO2e in Scope 1 and 2, and the measures will be in effect when performing the contract.

We have been purchasing 100% renewable electricity for all sites under our operational control (35 global sites in total), with the exception of our Singapore manufacturing site. As of the close of 2025, we are operating at 96% renewable electricity. We have implemented operational improvements focusing on energy reductions totaling 1700 megawatt-hours and reduced waste by over 630 metric tons, surpassing our 2025 target. In total, this has helped us reduce greater than 50000 tCO2e.

We have been phasing out the use of polystyrene in selected secondary packaging by using new plant-based, recyclable, cold storage shipping solutions. We have eliminated over 38,500 polystyrene boxes used in customer shipments equating to over 140,000kg of CO2e avoided.

We also utilize four strategies to reduce our transportation emissions: manufacturing in-region-for-region, switching from air to ocean shipments, revising packaging size and materials, and exploring new innovations which has equated to over 6550 tonnes in emissions savings, at the close of 2024.

### Planned reduction initiatives

In the future, we plan to implement additional measures such as:

- Identifying alternative materials that reduce our dependence on fossil fuels and decrease the environmental impacts of our products.
- Expansion of the electrification of our fleet vehicles.
- Exploring green heat programs to reduce or eliminate our dependence on natural gas.
- Optimize packaging to reduce space in shipments and increase percentage of recycled content.

### Declaration and sign off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard(1) and uses the appropriate Government emission conversion factors for greenhouse gas company reporting(2).

Scope 1 and 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard(3).

This Carbon Reduction Plan has been reviewed and signed off by our director.

Signed on behalf of the Supplier:

A handwritten signature in black ink, appearing to be "E. Abate".

Emmanuel Abate – Director of Genomic Medicine & Executive Leader, Sustainability Cytiva
