

Fast Trak™ process development services

Optimize your process development (PD)

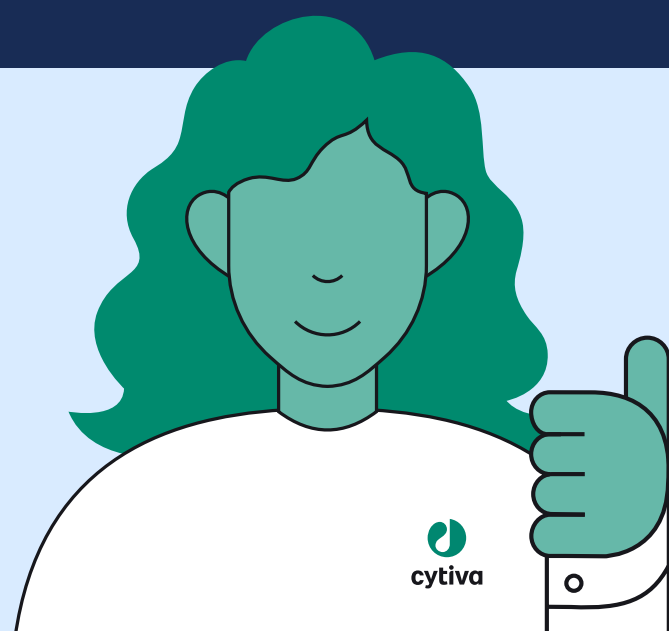

The development and optimization of your process, prior to scaling up or out, is critical to reduce the risk of scaling your inefficiencies.

Fast Trak™ process development services from Cytiva were strategically designed with five key components to help you achieve your PD goals:

Project management

1

Your dedicated project manager will help with the execution to facilitate communication and continuity, helping you keep the project on track, on time, and on budget.

2

Closed and automated process

Reduce the risk of contamination with closed, automated cell processing for end-to-end cell therapy production.

Media development

3

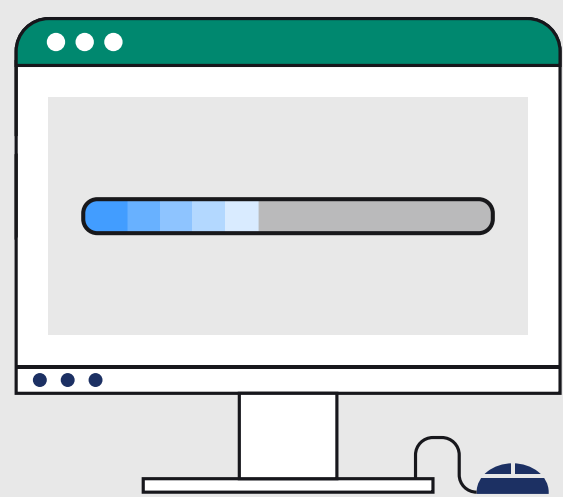

Choose either off-the-shelf or custom media designed to help you optimize your processes, improve traceability, and prepare for GMP manufacturing.

4

Tech transfer

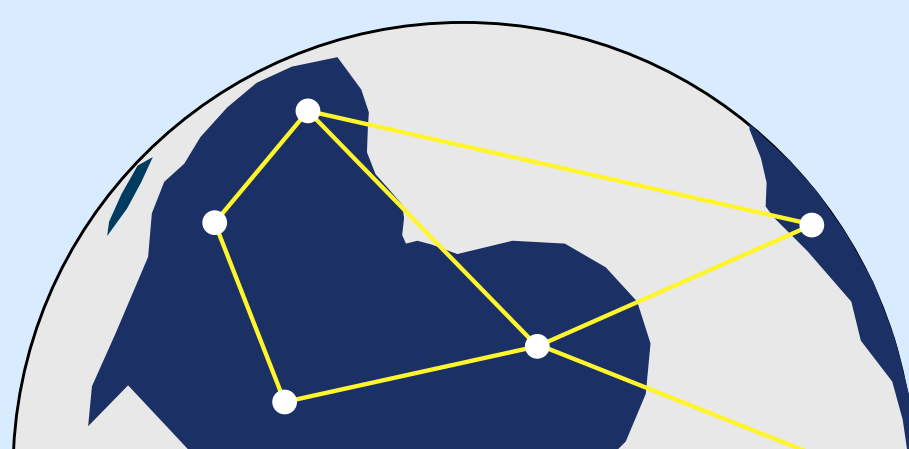

Experience smooth tech transfer of process development assets to help you prepare for GMP manufacturing and commercialization.

Speed to market

5

Reduce costs, mitigate risks, and accelerate your time to market — that's exactly what our Fast Trak PD services are designed to do.

Your process is unique. Connect with us — or explore more resources — to see how Fast Trak services can help you.
