

To whom it may concern

Regarding: Mixed branding

Dahaner acquired the GE Healthcare Life Sciences Biopharma business units (consisting of BioProcess, Cell & Gene Therapy and Genomics & Cellular Research) 1 April 2020. The business now trades under the brand name Cytiva.

It is hereby stated that the company brand name Cytiva (formerly GE Healthcare Life Sciences) will gradually be included in labelling and/or other product documentation such as certificates, user documentation etc. This means that the GE brand will be removed or replaced on our products and product documentation over time.

The changes in label and product documentation imply no difference in product quality or performance. Product quality release claims remain unchanged.

As a result of this change mixed branding on products and within shipments will occur.

- Finished products in our warehouses are rotated on a regular basis using first expired, first out inventory management and will not be re-labeled. During the transition phase, documents for products or services will be changed gradually in the coming year. For products with a longer shelf life (>2 years) the transition phase can last for several years.
- Mixed branding on products (shipments with differently branded products within the same shipment and/or a product carrying both brands) will occur during the transition phase. For products with a longer shelf life (>2 years) the transition phase can last for multiple years.

Please prepare to receive certain goods with brand name and legal entity details for both Cytiva and GE Healthcare Life Sciences for a period of time. Please ensure that your warehouse and Quality Control release personnel are informed and take necessary actions.
