

# Our commitment to sustainability

Thriving people, thriving planet, a thriving business. For Cytiva, these three aims are deeply connected. Achieving them is our ambition and our responsibility. That's why we commit to integrating respect for people and care of the environment in our decisions in ways that have a lasting impact on society, our customers, patients and Cytiva associates.

## We commit to:

**Designing in environmental and social priorities and high ethical standards throughout Cytiva's operations and in our strategy.** We take seriously the effects of our decision-making and business activities on people and the planet, working systematically to reduce negative impacts in our own operations and along our value chain.

**Delivering lasting value** to our customers and suppliers — and hence to Danaher — and not at the expense of future generations. We recognize the urgency of climate change and are committed to tackling it head on.

**Making a meaningful difference to patients' lives and to society at large.** Cytiva endorses the United Nations Sustainable Development Goals and contributes to achieving them through our operations and by working together with others.

This statement of our commitment to sustainability reflects our support of the UN Global Compact and its 10 principles on human and labor rights, environmental protection and anti-corruption. It is echoed in relevant policies, procedures and strategic priorities across Cytiva.
