Immunodiagnostics

Antibody, protein enrichment and purification technologies to facilitate immunoassays

Immunodiagnostics uses the ability of antibodies to specifically bind to an antigen of interest. Which products and solutions should you choose to support your immunoassay, immunoprecipitation and plate requirements?

Custom solutions for genomics

Whether creating a custom bead, a specialized enzyme, or a convenient kit for a repeated workflow, we will work with you to share progress and optimize outcomes. We are committed to providing a specialist service based on collaboration and responsiveness to add value, allowing you to focus on results.
