To Whom It May Concern

Cytiva works with its suppliers to ensure compliance of articles imported or manufactured within the European Union that are subject to the REACH regulation (EC - No 1907/2006), Article 33, and used in the production of Cytiva products.

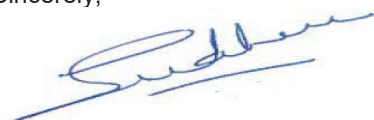

Regarding the application of Article 33 of the REACH regulation and the publication of the Candidate List of Substances of Very High Concern (SVHC) according to Article 59 of REACH regulation, Cytiva is aware of its legal obligations and will comply with them.

To best of our knowledge and based on information available from suppliers, Cytiva articles containing greater than 0.1% by weight of one or more substance of very high concern (SVHC) at article level as defined by the REACH regulation (1907/2006) have been listed in the table below.

Some of the articles contain substances on the REACH authorization list. However, the affected components are manufactured outside EU and hence applying for authorization is not required.

Please do not hesitate to contact me if you have questions on specific products sold to you by Cytiva, regarding the REACH regulation.

Sincerely,

Sudhananda V
