

# OptiRun™ Service Solutions

## Biacore™ routine maintenance

Use the maintenance chip when running the **Desorb** and **Sanitize** methods. Before usage, inspect both sides of the chip. If necessary, clean surface with water and wipe dry.

### Daily

- Filter and degas buffer
- After running an experiment, always keep system in **Standby** (Continue) mode

### Weekly

- Run **Desorb** (see **Tools** menu)

### Monthly

- Run **Desorb** and **Sanitize** (see **Tools** menu)
- Run system check from the **Tools** menu, according to instructions in methods; all necessary reagents are found in the system check kit

The following inspections can be performed on Biacore™ T200, S200, X100, and C:

- **Sample area inspection:** inspect connector block and injection needle for salt residues. If necessary, wipe clean using deionized water. Also inspect sample compartment and tubing connectors for salt residues. If residue is found, please contact your local service representative for advice.
- **Pump inspection:** inspect pump tips for leakage (leakage beneath tip) and contamination (residues on tip). If leakage or contamination is found, please contact your service representative for advice.

**Extended LifeCycle**

**Service traceability**

**Maximized  
productivity**
